ABOUT ME

I'm a 30-year-old guy who is currently studying at Hyper Island to become a Front-end Developer. But that might not say much about me as a person, so who is Ahmed? I was born in Sweden but spent part of my childhood in England, which has given me a unique blend of British and Swedish culture. This dual cultural background has taught me to appreciate both the tranquility of nature and the dynamic life of the city.

My passion for technology led me to become a DJ, a hobby I pursued for nearly 13 years. Although music is still a big part of my life, my focus has recently shifted towards development and IT. I spend my days improving my coding and design skills, and when I'm not at the computer, I find balance through exercise or by spending time with friends and family.

AHMED SHARIF

FRONTEND DEVELOPER STUDENT
